Meeting ID: 998 6367 8964

Passcode: 064022

Dear Colleagues,

Let me wish all of you a Happy New Year 2022!

The past year was challenging but we have managed it reasonably. The coming year is very important for all of us - personally and as members of SCDT and FlexE Centre. In our weekly Tuesday seminar, I would like to start off with a brief "State of the Centre" presentation.

My presentation will be followed by a presentation and discussion lead by Mr. Biswanath Panda on an exciting and important topic. The details of the talk on "Emerging Technologies and the Hype Cycle" by Mr. Panda appear below. I welcome all of you to join the Weekly Seminar of our centre in the new year.

With regards  
S.K.I.

~~~~~ Details of the Seminar ~~~~~

Weekly Seminar:

Title: "Emerging Technologies and the Hype Cycle"

Abstract of talk:

~~~~~  
When new technologies emerge with bright promises, how do we differentiate the hype from what's commercially viable? Hype cycles help us with a graphic representation of the maturity and widespread adoption of technologies, and how they are relevant to solving real life problems and exploiting new opportunities.

Hype Cycle offer a snapshot of the relative market promotion and perceived value of innovations for stakeholders, a view of how a technology will evolve overtime, highlight over-hyped areas and provide actionable advice to help organizations decide when and what to adopt.

Bio:

~~~~~  
Biswanath Panda is currently the Team Leader of System Integration Group at FlexE Centre; IIT Kanpur. He has over 15 years of experience in the field of Electronic System Integration and Robotics. He completed his B.E in Electronics and Communication Engineering from The University of Burdwan.
